

Early Intervention

Program

Adolescents identified as being "at risk" by educators, parents, or doctors are provided with an opportunity for a private, one-on-one session on the KED Campus with their parent(s)/guardian, a KED specialist, and a peer in recovery.

Session lasts about 60-90 minutes and utilizes brief, change focused, cognitive behavioral strategies.

What to Expect

- Student/parent(s)/specialist discuss the sequence of events that led to the referral and answer questions regarding the student's use of drugs/alcohol
- Student and parent(s) have private sessions with our specialist and with young people in recovery
- Everyone comes back together for wrap up/possible referral/next steps

HOW TO HELP

What will help make this a productive meeting?

- Join us with a positive & open mindset
- Be honest and upfront with our specialist and peer
- Follow through with any recommendations that are made
- Complete a follow up evaluation via phone 2 months after you attend the program
