

Parent2Parent

Our Parent2Parent proactive conve establishes a stigma proof way to e parents about the trends and consequences of adolescent substance use and addiction. Our interactive panels include an addiction counselor as well as a relatable parent and/or adolescent in recovery (when available) to deliver some powerful messages.

## Goals

Educating parents about

- The prevalence and harmful effects of adolescence alcohol use
- Life altering affects of drug experimentation, use, & dependence

We also offer

 Resources for substance abuse prevention, treatment, and recovery

"The stigma is still there, and we need to let others know that this is a disease, just like diabetes and cancer. By offering education in a group (such as to parents), everyone benefits. Even if they don't have something going on in their family, they most certainly know someone who does. The only way to stop this epidemic is to educate."

-Parent of a child who lost his battle with addiction
