

3-21-20

Dear Members of the West Seneca School Community,

This morning the Buffalo News reported a confirmed case of COVID-19 in the town of West Seneca. We reached out to the Erie County Health Department to determine whether this case involved a connection to our schools. While the official at the Health Department was not able to provide specific information regarding this confirmed case due to health privacy laws, we were told that the district would have been notified had there been a connection to our schools. Therefore, we are under the assumption that there is no connection between our school system and this confirmed case. Best wishes to this individual on a full and speedy recovery. To all the families of our school community, please take care and stay safe.

Sincerely,

Matthew Bystrak
Superintendent of Schools
